THE NEW ERA.

Newmarket, Friday Oct. 29, 1858.

General Summary.

The prize list of the Stouffville Agricultural Fair is unavoidably crowded out. It will appear next week.

We have been requested to announce that Elder H. H. Hovey will speak in the Cheltenham Chapel last Sabbath morning at 10 o'clock.

The Royal Gazette of Saturday last announces that our townsmen, Mr. J. H. Estey, has been appointed a Notary Public for Upper Canada.

The Reformers of Toronto have nominated Adam Willson, Esq., Q. C., as their Reform Candidate for Mayor at the forthcoming election. Wm. L. Mackenzie, Esq., has declined being nominated by any party.

The Lower Canadian papers announce the death of Dr. Gaucan, M. P. P., for St. Maurit. For some length of time the Dr. has been ill, and gradually given way until the 8th ult., when he expired.

The Rev Mr. Hooper, and a gentleman in company with him, met with a narrow escape from injury, in this place, on Wednesday last. While driving along Main Street his carriage came in contact with a team's wagon, precipitating him to the ground. The shafts of the carriage were broken, but no personal injuries, of any account, were received.

We have pleasure in congratulating the Reformers of this constituency on the prospects of returning health of Joseph Hartman, Esq., M. P. P. He paid a visit to this locality on Tuesday last, and to all human appearance, is gradually rising above his present illness. Should his health continue to improve, he will be able to take his seat in the assembling of Parliament.

The Canadian Phonetic Pointer.—This is the title of a little paper published at Oshawa, with a view to foster and encourage short-hand writing. The enterprising publisher deserves, and we have no doubt will receive, much credit for his efforts to cultivate an art of so much practical value and usefulness. It is issued monthly at Oshawa, at the low price of 25 cents per copy.

Mr. T. L. Heacock, farmer, Yonge St., met with a narrow escape from a serious fire, during the past week. By some manner of means a large stack of straw became ignited in his barn-yard, situated only some fifteen feet from the barn, and was burned up; but by the aid of neighbors, who were prompt in their assistance, the barn was saved. May this incident prove a timely warning to all. Farmers should see to it, that ladders are placed in convenient places to meet such emergencies, with other necessary apparatus.

On Wednesday last, Mr. J. Brown, of the 2nd Concession of Whitechurch, was returning home from Newmarket, some part of his hands gave way and thus let the buggy run against the legs of his horse. The animal became frightened, and on turning the corner to cross the bridge over Water Street, the carriage upset, precipitating Mr. Brown and his wife into the street. Although both were severely hurt, fortunately no bones were broken.

Mr. John Evans, of East Gwillimbury, we understand, met with a serious accident on Saturday last. The particulars that have reached us are these:—While on his way home from Mount Albert, the hold-backs in the shafts of his buggy gave way, and his horse became frightened and unmanageable, and he was thrown out against a stump, breaking one of his legs a little below the knee, and receiving several severe contusions. Dr. Morris was speedily summoned, who dressed the limb, and we now learn he is doing well.

A general meeting of the members of the Newmarket Mechanics' Institute was held in the Temperance Hall on Monday evening last, to receive the report of the Committee regarding the course to be pursued during the coming winter, which, after some discussion, was adopted. This report recommends three public lectures, and one public debate every month; also, the holding of a mechanical and fine arts exhibition at the close of the seasonal exercises. After the general business had been transacted, another meeting was formed and the debating society organized. The first debate takes place on the 4th proximo—lectures on the evening of the 5th. From all the information we can gather, the prospects of the association are very good.

The newly-hired scutler, who does the daily work of the Sun & Aurora, continues his silly twaddle and vulgar abuse against the *Era* and our coterminous, the Richmond Hill *Timeline*; but for our part, as the Hibernian said when kicked by a donkey, we would resent the insult but considering the source from whence it comes, it is too contemptible. We would be very sorry to lower ourselves so far as to be placed in a par with a man lost to common sense, of even common decency. Entertaining these views, we beg to tender to our readers an humble apology for having occupied so much of our space in commenting upon the vagueness of the *Sun* and have only to offer as an excuse, we did considerately edit and then we now fill our mistake.

A new paper has been issued at Markham called the *Comet*, to occupy the same position in that city, as the *Grampus* in Toronto. It is indeed quite a silly paper. Here is an extract:—

“APPEAL FOR THE CIVIL SERVICE OF CANADA.”

“To be able to use three hundred telegraphs at a general election.”

“Rules to be observed after entering the Civil Service.”

“To swear that black is white, and that no color at all.”

“Qualification of a conductor or other official on the Grand Trunk Railway.”

“To be thirty second great grand son of Foster-Brother of a scaly English Aristocrat.”

“Rules to be observed after being employed.”

“A hasty contract for every coat not cut after the neatest fashion.”

The grand jury at the late session of the County of Simcoe have set an example which we should very much like to see generally practiced. In their recent judgment, they take it upon themselves to meddle with the political concerns of the country, and condemn every journalist in the Province who has had the independence to tell Sir Edmund Head and his advisors wherein they consider a wrong has been perpetrated. Just look at the effect. Old Ontario is composed of a majority of odd shift politicians and make no presentment, an opposing party, into the majority of the following Assemblies, and contrary opinions are expressed. By and by justice will be intrusted in accordance with the political practices of the parties interested. O! for shame!—like the man that fired the bullet at Ephesus, who people like to distinguish themselves with their weapons composing the Grand Jury at the late Barrie election.

Our Common School.

A competition will be started elsewhere to day, signed “Trustees,” to which we beg to refer the inhabitants of the Village interested in our Common School. We have neither wish of inclination to enter into a lengthy discussion on the subject dilated upon; but we humbly submit, with all due deference to the opinion of a “Trustee,” that his letter is altogether wide from the mark and to a certain extent disengaging, exhibiting a studied attempt to mislead. In the first paragraph he says—

“All the parties interested in the Common School may not be aware of the position of matters in reference to the extension of accommodation; I have thought a short statement in connection therewith might be acceptable to your village subscribers.” No doubt of it; but we have read the letter carefully over, and fail to discover what extension is contemplated. True, we admit our subscribers, but we should like to have some knowledge of what the “various trustees” of the Board was.

Now mark—“Acceptable to your village subscribers.” No doubt of it; but we have read the letter carefully over, and fail to discover what extension is contemplated. True, we admit our subscribers, but we should like to have some knowledge of what the “various trustees” of the Board was.

“The “cutter” is not to be no great as to be of

particular moment and the Board takes a live

interest in the welfare of the school.”

“Now what is the object of reporting to another meeting, a confidence, a plan which the Trustees have already carried into effect?” The idea is positively ludicrous, to say the least.

The way we look at the matter is simply

thus—more accommodation was required; and

the Trustee, wishing to obtain the opinions of

the rate-payers, called a public meeting to have

them determine what should be done. That

meeting appointed a committee, consisting of

the Trustees, to make a plan and report at a

subsequent meeting. That report has not yet

been submitted; and hence we hold the

Board has neither the right or power to make

further accommodations until that report is pre-

pared. Should they report, the putting up

of temporary and unsightly board partition

wise through the room, and that report is ad-

opted, all very well; but unless this is done,

we have the unheard of proceeding of a board

of Trustees referring a matter of the rate-pa-

yers, and before they decide or adjudicate on

the same, stepping in and demanding a revo-

cation, thwarting the best wishes of the peo-

ple. We still be distinctly understood at

this point:—The Board have no right, consider-

ing the steps already taken of referring the

matter to the rate-payers, to do anything to-
wards increasing the school accommodation,

and thereby increasing the taxes, without first

submitting a report to another meeting. The

object of the alteration of the present build-

ing was spoken of at the late meeting, and con-

sidered one of the plans that should be reported

upon. Besides, we have at good authority,

that the Trustees were not unanimous in the

hidden arrangement spoken of by our

correspondent—all present were not “solid

men,” and gentlemen, at least, was about

the meeting of the Board when the “arrange-

ment” spoken of was agreed to. We

have not written this article with a view to

create any feeling in the matter; but we dis-

like to see our public men pursue a “wifey

course, and attempting to justify them-
selves on the ground of expediency or peculiar

knowledge.”

Again, a “Trustee” does not pretend to

deserve the reasonableness or soundness of our

proposition. The question with us is this: we

have a large School House—quite large

enough, with proper arrangement; for two

classes; and we pointed out to a certain ex-

tent, how that arrangement might be made;

but does a “Trustee” attempt to “show” any

disadvantages of that arrangement? Not a

bit of it; but gives the people to understand

he will tell them what the Trustees have de-

termined to do, and winds up without “doing

it.” He says “the Board have not constituted

recommending a plan that would satisfactorily

increase the burdens of the inhabitants in a

peculiar point of view.” We are glad of

the figures of majorities, to stand “Nar-

rowe,” 2602; “Brassey,” 1610; & the

following statement will show:

“Non-British,” Brassey.

Mr. Alliss’s majority 2443.

“Campbell,” 1111.

“Alexander’s,” 79.

“Crawford’s,” 53.

“McDonald’s,” 275.

“Christie’s,” 1265.

Total, 5549.

By the above it will be seen the Brassey

Government, and the Campbell Government

are in a dead heat, and the Alexander Gov-

ernment is slightly in the lead.

On matters of public interest, or regarding

the prosperity and general well-being of the

country, it is our practice, as the creator

of a public journal, to make suggestions

and point out advantages; but it is the duty

of those interested to act upon them or other-

wise, as may be deemed expedient. Enter-

taining these views, we respectfully invite

the attention of the members of our Mechan-

ics Institute to the consideration of a patter-

of no small importance, towards securing the

prosperity of that Institution. Now that an

adequate supply of coal is now to be had

at a reasonable price, we

desire to call the attention of our

readers to the following

ELECTION FOR SHERIFF.—Mr. Guernon was returned for this Division by a majority of thirteen hundred.

(107) The New Orleans printers and telegraph operators are taking steps for the erection of a monument over the grave of Franklin.

(108) The shipments of wheat from Milwaukee to this district up to October 2, have been 3,135,605 bushels; and flour, 217,900 bushels. Adding the shipments of other grains, the whole amount of grain shipped from Milwaukee thus far this season, is nearly five million bushels.

The Victoria Tunnel Bridge.—The pier for the Tunnel Bridge will be raised above the water this fall. There are at present scaffolding up for thirteen tubes, all of which will be completed this season; fourteen would have been laid, but one was unfortunately lost. It is the determination of the managers to have the bridge wholly completed next year—probably by October.

THE CHAMPIONSHIP OF THE LAKES.—We are happy to learn by a telegraph received in toria yesterday that the Toronto boat came off victor at the great match at Detroit, between the Chicago and Toronto boat clubs, for \$500 a head and the championship of the lakes. A dozen was five miles, or two and a half miles up stream and return; and the telegraph states that the Toronto boat gained by half a mile. The Toronto crew were—Mr. W. Dillion, stroke oar; Mr. T. Tinning, mid oar; Mr. M. Teddy, and co; Mr. J. Tinning, bow oar; Mr. Tinning, aged 11 years, coxswain. The full particulars we will give on Monday.—*Globe*.

MORSE, the inventor of MORSE'S INDIAN ROOT PILLS, has spent the greater part of his life in travelling, having visited Europe, Asia, and Africa, as well as North America, has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered.

Dr. Morse was the first man to establish the fact that all diseases arise from IMPURITY of the BLOOD—that our strength, health and life depends upon this vital fluid.

A. J. WHITE, & Co.

50 Leonard Street, New York.

DR. MORSE, the inventor of MORSE'S ROOT PILLS, has spent the greater part of his life in travelling, having visited Europe, Asia, and Africa, as well as North America, has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered.

Dr. Morse was the first man to establish the fact that all diseases arise from IMPURITY of the BLOOD—that our strength, health and life depends upon this vital fluid.

When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted and diseased; thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humor, the blood will become choked and cease to act; and thus our light of life will forever be blown out. How important then that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs in Nature's garden, for the health and recovery of diseased man.

One of the roots from which these Pills are made is a Sutorifice, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is an Expectorant, and opens and unclogs the passage to the lungs, and thus, in a soothing manner, performs its duty, by throwing off phlegm, and other humors from the lungs by copious spitting. The third is a Diuretic, which gives ease and double strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out bountifully by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Calmative, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the outer outlets, are thus taken up and conveyed off in greater quantities by the bowels.

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach, but become mixed with the blood, for they find way to every part, and completely root out and cleanse the system from all impurity, and the life of the body, which is the blood becomes perfectly healthy; consequently all, sickness and pain is driven when the body becomes pure and clear.

The reason why people are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the afflicted parts, and which will open the natural passages for the disease to be cast out; hence, a large quantity of food and other matter is digested, and the stomach and intestines are literally overflowing with the corrupted mass; thus prolonging disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery until life is taken from the body by disease.

Dr. Morse's PILLS have added to themselves victory upon victory, by restoring millions of the sick to blooming health and happiness. Yet, thousands who have been racked with sickness, pain and anguish, and whose feeble frames have been scorched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead; had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, they were astonished, and absolutely surprised, in witnessing their charming effects. Not only do they give immediate ease and strength, and take away all sickness, pain and anguish; but they at once go to work at the foundation of the disease, which is the blood. Therefore, it will be shown, especially by those who use these Pills, that they will so cleanse and purify that disease—that deadly enemy—will take its flight, and the flush of youth and beauty will return, and the prospect of a long and happy life will enrich and brighten your days.

CAUTION.—Beware of any counterfeit signed A. J. MORSE. All genuine have the name of A. J. WHITE & CO. on each box. Also the signature of A. J. WHITE & CO. All others are spurious.
